

SMART SOLUTIONS FOR THE AUTOMATED WAREHOUSE AND THE DIGITAL SUPPLY CHAIN.

Efficient. Cost-neutral. Climate-friendly.

For logistics, speed, process safety, and real-time transparency are key factors for the success of your advance in the digital supply chain. The ICS Group presents innovative concepts and integrative solutions that will optimize your individual processes – future-proof, sustainable, and expense-optimized.

Convince yourself of the advantages of our software solutions and smart technologies at a virtual tour of our exhibition booth.

7 good reasons for your supply chain:

- ✓ Increased production and warehouse throughput
- ✓ High-available IT processes – 24/7/365
- ✓ Transport efficiency (intra- & extra logistics)
- ✓ Reduced CO₂ emission
- ✓ Comprehensive IoT process control
- ✓ End-to-end process transparency
- ✓ Optimized cost structures

WE ARE THE SUPPLY CHAIN ARCHITECTS.

SOFTWARE HIGHLIGHTS ON OUR BOOTH

Warehouse Management System

Tried and tested for more than 20 years, STRADIVARI® WMS integrates modern warehousing technology and mobile processes, tailor-made to your requirements and with guaranteed 360° monitoring. Scaling is ultra-flexible, with ready-made modules for transport management, inventory and much more.

Business Smartwatch for Intra-Logistics

The ICS Business Smartwatch solution helps you manage data for goods inwards or for commissioning – mobile and hands-free, with optional support through the precisely fitting periphery such as ring scanners. The intuitively operable user interface uses a touch display for all dialogs.

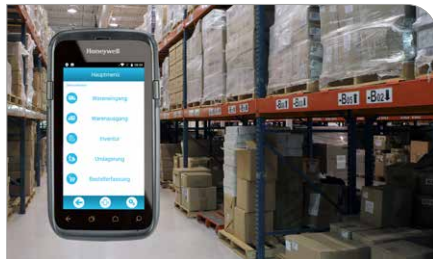

AWARD-WINNING SOLUTION

Mobile Extra Logistics and Track & Trace

4mobile organizes your order management for the field staff comprehensively, bi-directional, and real-time. Digital workflows, telematics, geo-fencing etc. manage economic and ecological processes in transport logistics, reverse logistics, store delivery, and service.

OUT-OF-THE-BOX SOLUTION

ICS easyWMS and ICS StoreManager

The slim, ready-to-use ICS software handles stocktaking and goods movement in your warehouse and in retail environments, voucherless and faultless. The software is standardized for batch processes (WLAN/WAN optional) and ready for Android devices like smartphones, PDAs and tablets.

POWERED BY
Quuppa

Real-Time Locating System (ICS RTLS)

ICS RTLS is an intelligent, cost- and process efficient indoor solution with Bluetooth LE technology that guarantees an extremely accurate real-time geolocation of goods, carriers, and means of transportation. It eliminates search times, ensures transparency and optimized routes, and reduces your TCO.

POWERED BY
Qognify

Business Video Intelligence

Intelligently linked process and video data simplify your production, logistics, and trade processes. Digital video information provides support e.g. in connection with Track & Trace for goods and shipments on factory sites, quality assurance in dispatch, or presentation of goods at the point of sale.

Android Mobility for Your Warehouse

Analysis, concept, solution: Migrate from older Windows operating systems to the future-proof Android™. ICS offers custom-configured hardware, compatible enterprise browsers and software. We also reliably transform your existing, Windows-based solutions.

Expert Auto-ID Solutions

Mobile computers, wearables, vehicle terminals, MDE / PDA, scanners, printers, RFID & sensorics or network technologies: Tailor-made, manufacturer-independent system solutions provide optimal process safety, productivity and work ergonomics.

Software-Integration

ICS helps you select, configure, implement, and network software solutions – including financing modalities for all company sizes. On request, our specialists will train your staff to ensure motivation and state-of-the-art knowledge in your enterprise.

SCALABLE SERVICES

ICS Service Packages

Reduce complexity right from the start: Based on your requirements, ICS centrally handles the deployment of devices, preventative maintenance and repairs. Our multi-lingual service desk and in-house repair center provide high-available IT which brings you time and cost advantages.

Enterprise Mobility Management (EMM)

ICS EMM offers the economical and safe operation of your mixed, mobile hardware either as software-as-a-service (SaaS), or optionally as a managed service. Stage your hardware centrally, manage your apps & services efficiently, and minimize the risk of data theft.

Supply Chain Managed Services

Real-time planning, operations and KPI optimization: The individual set of KI-supported automation and managed services makes your agile supply chain come true. Secure this advantage for you and make your net product sustainable – for mankind, environment, and your corporate success.
