

## PHILIPS MEDIZIN SYSTEME GMBH

Accelerated and transparent logistics processes thanks to mobile<sup>4</sup>SAP

### Our Customer

Philips Germany GmbH comprises the divisions Lifestyle, Lighting and Healthcare. The area Healthcare is represented in Germany by Philips Medizin Systeme Böblingen GmbH, with offices in more than 60 countries and production facilities in the Netherlands, Germany, Finland, Israel and the USA. In total, around 33,000 employees work for the company.

### PHILIPS' Challenge

As contract logistics provider for Philips Medizin Systeme GmbH, Müller Lila Logistik Deutschland GmbH operates as a warehouse. So far, all warehouse tasks were managed via the existing SAP® system as well as a non-SAP warehouse management system. The company wanted to replace the previous paper-based warehouse processes and accelerate process throughput times in the warehouse.

All postings had to be entered immediately and directly into the SAP system. The aim was to make the transactions easier to manage and process.

WE ARE THE **SUPPLY CHAIN ARCHITECTS.**

## Our Solution

Due to its modular construction manner and multitude of existing SAP standard transactions, the client opted for the ICS solution mobile4SAP. Other factors that weighed into the decision were the use of SAP ITSmobile, the standard for imaging of mobile processes recommended by SAP, and the creation of all transactions in ABAP.

In addition, SAP ITSmobile supports the output of voice messages. The starting point of the ICS mobile4SAP® solution is the Basis Framework with which all customer needs are quickly and easily implemented.

From the 150 available mobile transactions of the mobile4SAP solution, several SAP transactions were selected and flexibly adapted to the customer needs.

## In a Nutshell

### The company

Philips Medizin Systeme Böblingen GmbH  
[www.healthcare.philips.com](http://www.healthcare.philips.com)

### Industry

Healthcare

### Project Challenges

- Integration of logistics processes into SAP®
- Acceleration of throughput times
- Connection of mobile data acquisition devices to SAP®

### Solution

- Choice of 150 mobile transactions
- Basis Framework
- Connection via SAP® ITSmobile

### Result

- Replacement of paper-based storage tasks
- Acceleration of processing times
- Direct posting in SAP & high user acceptance

## The Result

Thanks to the use of the ICS solution mobile4SAP, all paper-based storage tasks were replaced by MDE supported processes. As a result, processing times in the warehouse have been significantly expedited. All stock movements and inventory changes are recognized directly in SAP. Due to the success of the project in the warehouse, additional transactions were selected from the mobile4SAP package and expanded into production. The rollout of ICS mobile4SAP to other international locations is planned.

The ICS Group is looking forward to speaking with you!
