

GOODS MOVEMENTS IN RETAIL

Paperless data acquisition via immediately usable Android App

Relieve employees & save time

Fast, simple and error-free - this is how the requirements for goods recording can be summarized. We have put together a package for the retail sector that makes retail processes such as goods receiving, order entry and inventory more efficient.

The ICS StoreManager is easy to use thanks to its clear structure and therefore requires low training needs. Additionally, the Android app ensures paperless data entry.

In many cases, the handling of paper lists is still part of the daily routine in retail trade.

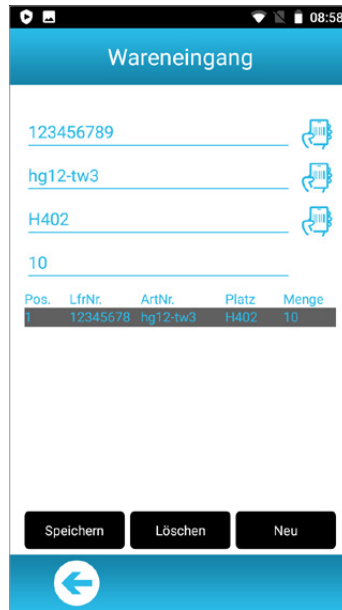

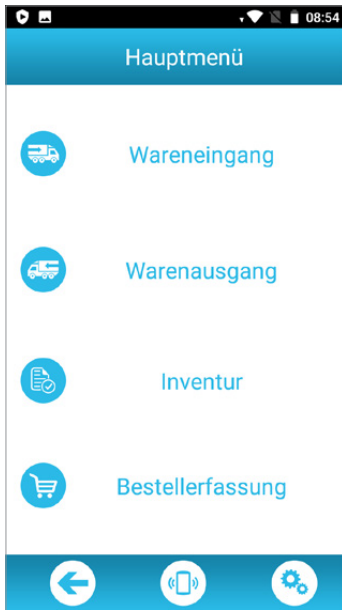

The introduction of complex automation technology usually implies high costs.

The standard software ICS StoreManager offers a compact mobile alternative. Goods receiving, order entry and inventory are the core functions of ICS StoreManager. It convinces by clear and simple operation and is particularly interesting for the retail trade thanks to its price-performance ratio.

Optional features such as price queries, price labeling and returns entry make it a multi-talent.

WE ARE THE SUPPLY CHAIN ARCHITECTS.

INTUITIVELY OPERATED SOFTWARE INTERFACE

Prepared for Android devices like
smartphones, PDAS, tablets.

ICS StoreManager supports in the standard solution:

- Standard processes goods receiving, inventory, redistribution and goods issue
- Fast and error-free recording of articles by scanning
- Alternative: Manual input of e.g. article number, delivery note number and quantity
- Input of quantities, storage location
- Distinction of shops, user and areas
- Simple data transfer via USB, optionally WLAN
- List display of the recorded data
- Personal configurations are possible, e.g. activation and deactivation of menu items
- Optional: price inquiries, price labeling with mobile printers, returns entry

Your new employee for...

- ✓ **GOODS RECEIVING** – clearly recorded
